super normal object

There is something about the fluorescent tube that makes it a super normal object. It is the most common lighting fixture in the world, and it is the most common lighting fixture in the world. It is the most common lighting fixture in the world, and it is the most common lighting fixture in the world.

anything that can be seen as excellence, or as an unmistakably connotative brand, is incompatible with the status of the super normal object. The greatest degree of normality possible, "normality" in its ontological form, its quintessential perfection.

super normal is an oxymoron. The greatest degree of normality possible, "normality" in its ontological form, its quintessential perfection.

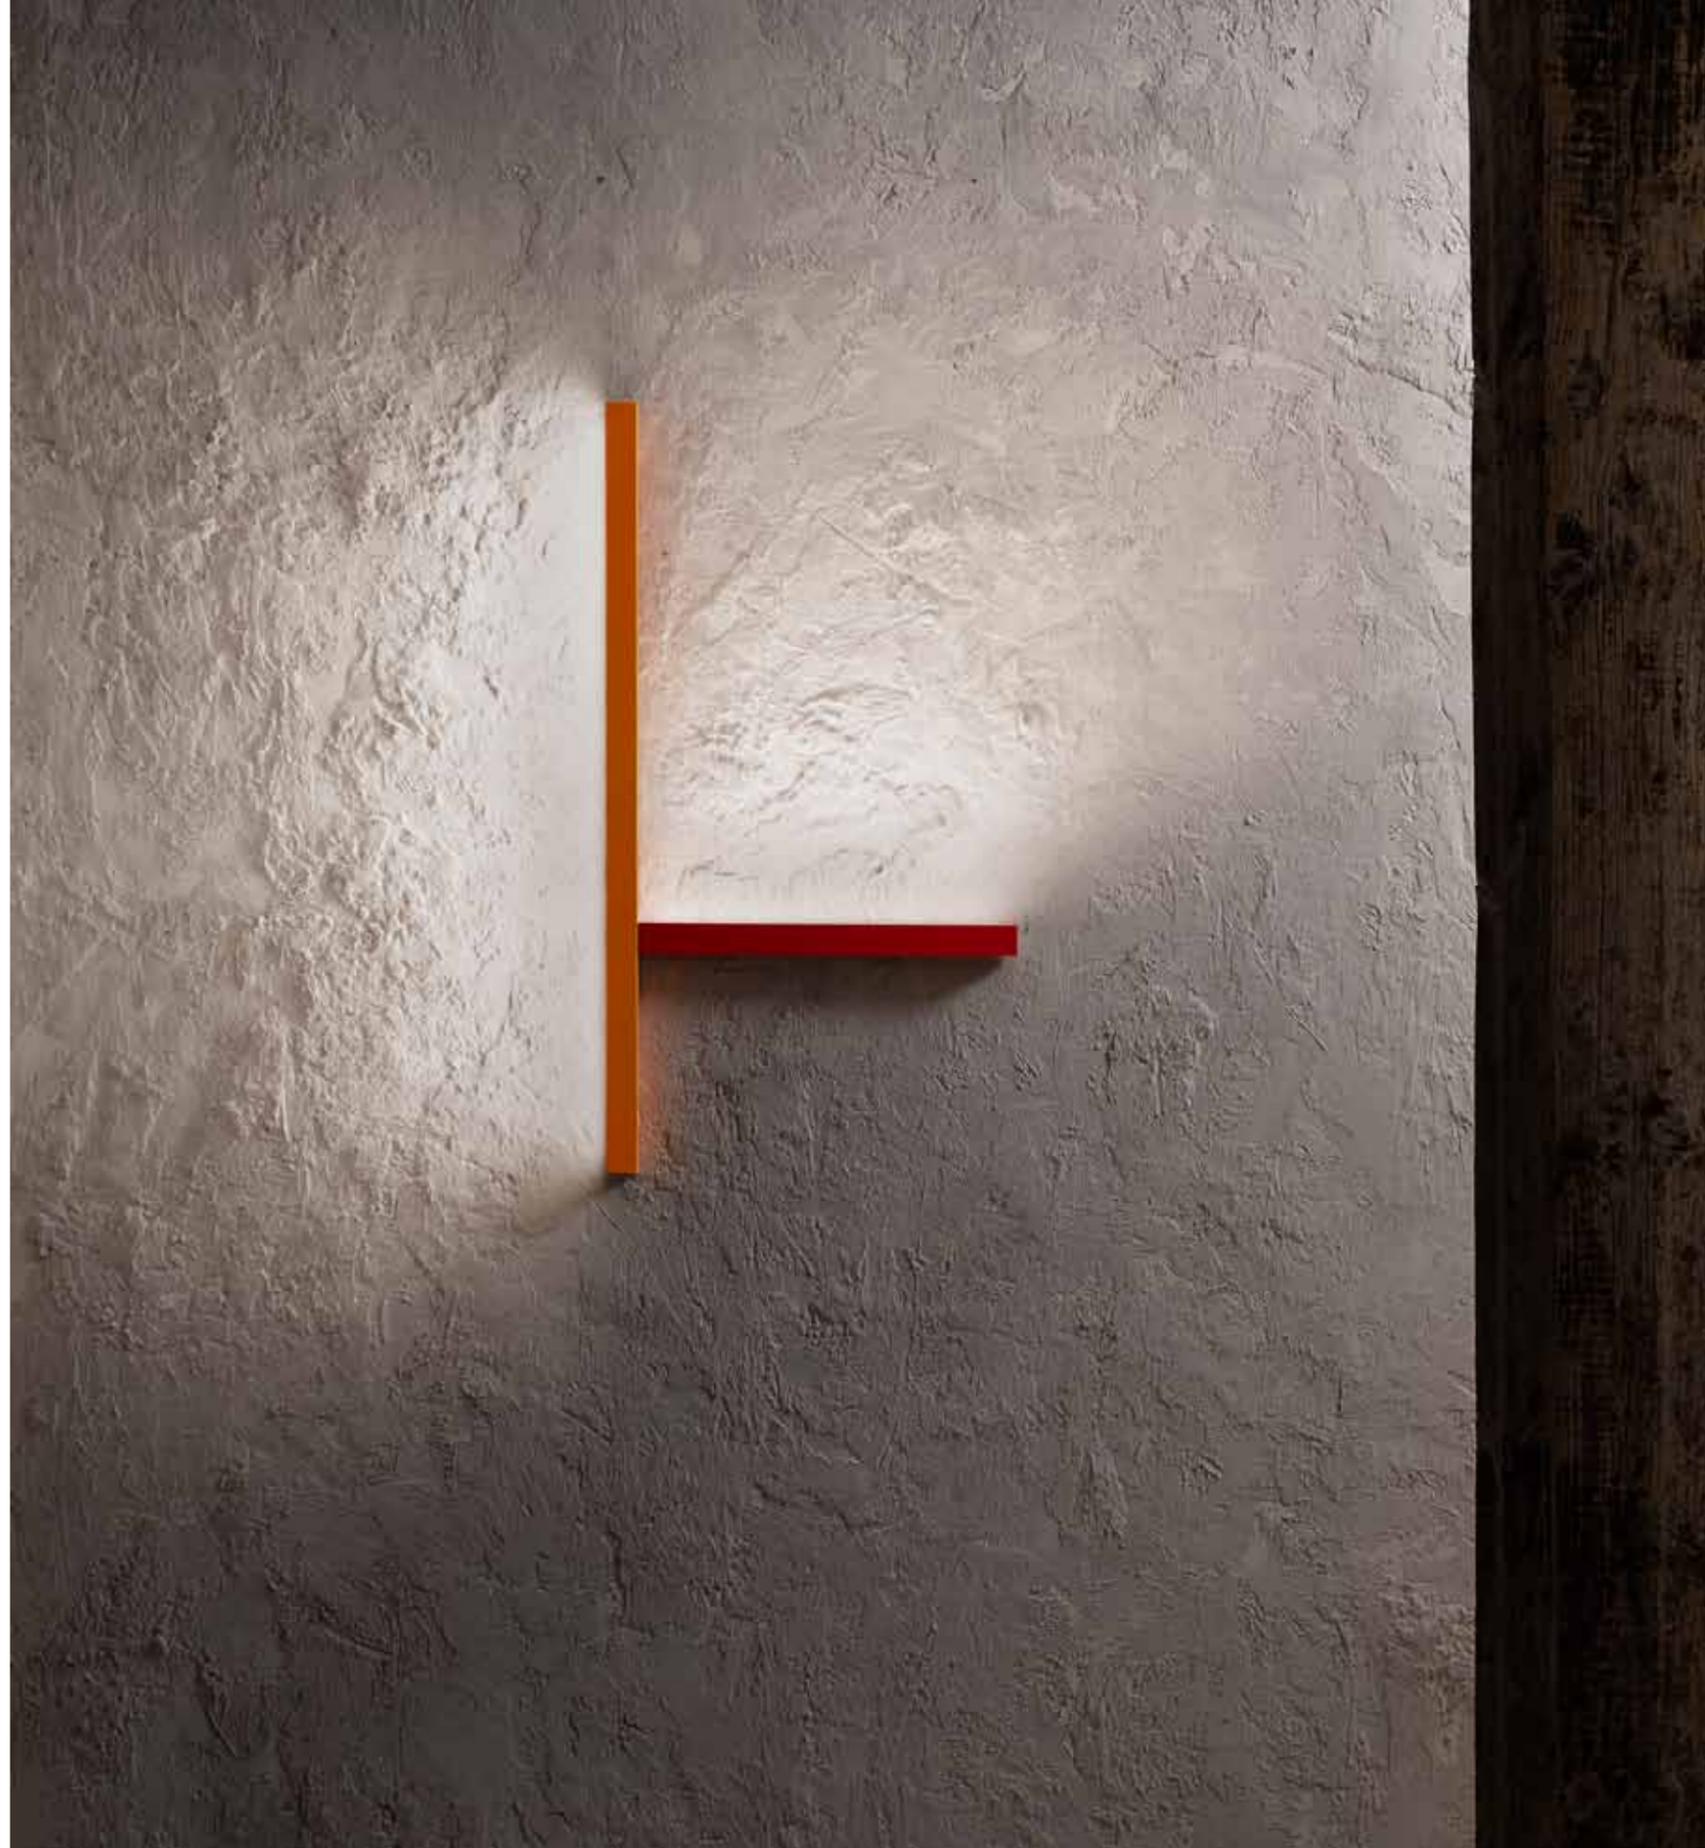

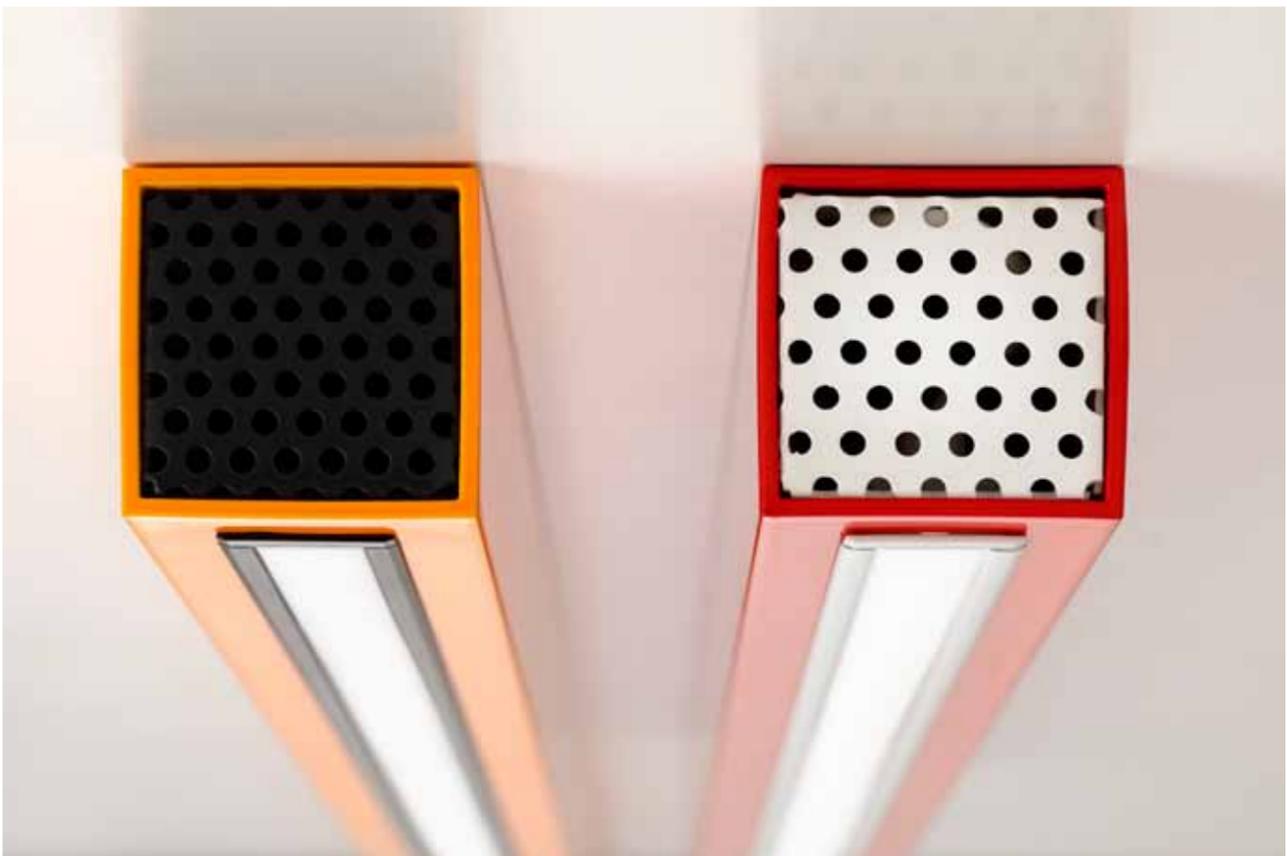

museum interpreta in chiave led contemporanea l'essenza del tubo fluorescente all'interno di un profilo in alluminio, un apparecchio illuminante modulare che può essere installato da solo come singolo elemento, oppure creare un sistema di illuminazione continua. un forte significato simbolico che riporta nel nome stesso la sua essenza.

museum interprets the fluorescent tube in a contemporary led key. inside an aluminum profile, a modular lighting fixture that can be installed alone as a single element, or create a continuous lighting system. the linear container element houses the easily integrated electronics.
